● OPEN TO ENGINEERING LEADERSHIP AND SENIOR PLATFORM ROLES

BANGKOK · APAC · EU · REMOTE

[01] PROFILE

EXECUTIVE SUMMARY

Engineering
leadership
since 1999.

Engineering leader with two decades of experience building cloud platforms and the teams that run them — comfortable in the org chart and comfortable in a terminal.

Deep, current expertise across AWS, GCP & Azure, infrastructure as code, DevSecOps, and platform engineering. I've led organisations as Director and Head of Engineering, and I'm equally happy in a senior individual-contributor or staff platform role. The work matters more than the title — what I look for is a team that takes craft seriously and a problem worth solving.

[02] CAPABILITIES

CORE SKILLS

Calibrated
against recent
work.

01	Team Leadership & Scaling	▬▬▬▬▬
02	Cloud Architecture (AWS / GCP / Azure)	▬▬▬▬▬
03	DevSecOps Implementation	▬▬▬▬▬
04	Platform Engineering	▬▬▬▬▬
05	Agentic Engineering & AI Tooling	▬▬▬▬▬
06	Strategic Planning	▬▬▬▬▭
07	Cost Optimization	▬▬▬▬▬
08	Zero Trust Security	▬▬▬▬▭

[03] TRAJECTORY

PROFESSIONAL EXPERIENCE

Mar 2026 — Present
ISMANING / DE · HYBRID

Lead IT Consultant

MSG SERVICES GMBH ● ENTERPRISE IT CONSULTING

Building and operating an internal Platform-as-a-Service — codifying the cloud estate as Infrastructure as Code, designing the developer platform, and shaping the delivery pipelines that engineering teams across the organisation depend on.

Hands-on across Terraform, Kubernetes, and CI/CD foundations, with a focus on operating model, governance, and DevSecOps maturity inside a regulated enterprise environment.

Authored the platform's SRE and observability strategy on Datadog — SLOs, error budgets, and incident response.

Apr 2025 — Mar 2026
LONDON / UK · REMOTE

Managing Director — *Founder*

TROPOSPHERE ● DEVOPS CONSULTANCY

Founded and operated a DevOps consultancy helping organisations modernise cloud infrastructure and engineering practices — service offerings rooted in AWS / GCP, platform engineering, IaC, and DevSecOps transformation across fintech, e-commerce, and SaaS clients before transitioning the practice in early 2026.

Mar 2024 — Nov 2024
BANGKOK / TH

Senior DevSecOps Engineer

SNOCKO ● CLOUD SECURITY

Led cloud security and infrastructure transformation on AWS — architected an account strategy following the Well-Architected Framework, implemented zero-trust identity and network segmentation across 50+ microservices, and rolled out Okta SSO to 200+ users. Materially reduced security incidents and infrastructure costs.

Aug 2023 — Dec 2023
BANGKOK / TH

Developer Productivity Lead

VEVE ● DIGITAL COLLECTIBLES

Established a Developer Productivity strategy that materially increased team velocity in four months. Built a self-service infrastructure platform on the HashiCorp stack (Terraform, Consul, Nomad), enabling five development teams to provision infrastructure autonomously — reducing provisioning from days to minutes.

Oct 2020 — Aug 2023
BANGKOK / TH

Head of Engineering

POMELO FASHION ● ASIA-LEADING FASHION TECH

Led a diverse engineering organisation across multiple specialised teams through a sustained period of growth. Implemented an OKR framework that moved reliability, deployment cadence, and recovery time in the right direction, and established an engineering culture through structured mentorship, technical guilds, continuous deployment, IaC, and comprehensive observability.

Led architectural work across data and ML — ingestion pipelines on AWS Glue and Lake Formation, modernised with Dagster, Airbyte, and dbt; end-to-end ML infrastructure streamlining data science workflows from local development to production inference.

Nov 2019 — Oct 2020
BANGKOK / TH

Director of Engineering

POMELO FASHION ● ASIA-LEADING FASHION TECH

Introduced DevOps culture and practices across the engineering organisation — lifting deployment from a monthly cadence to ordinary daily work, with production incidents falling alongside. Built and launched a dedicated platform engineering team whose shared services and internal tooling accelerated feature delivery across product teams.

Apr 2019 — Jul 2019
BANGKOK / TH

Principal Software Developer

NIMBLE ● LOYALTY PLATFORMS

Led the architecture and technical design of a client loyalty platform, translating business requirements into scalable technical solutions and executing a Ruby-on-Rails-to-cloud-native migration that improved reliability and reduced operational overhead.

Jan 2018 — Jul 2018
BANGKOK / TH

Lead Software Developer

GUARDRAILS ● APPLICATION SECURITY

Designed security-scanning microservices that processed large volumes of repositories daily across GitHub, GitLab, and Bitbucket — optimised through caching, parallelism, and efficient data structures so detection happened in seconds rather than hours.

[04] EARLIER

PREVIOUS HISTORY

From systems
administration
to
architecture.

2016 — 2018

Technology Specialist & Team Lead

MCKINSEY & CO · JAKARTA

2014 — 2016

Software Architect

MCKINSEY DIGITAL LABS · BERLIN

2012 — 2014

DevOps Engineer

TELEKOM INNOVATION LABS · BERLIN

2008 — 2012

Senior JavaScript Developer

VARIOUS COMPANIES · LONDON / BERLIN

1999 — 2008

Systems Administrator

MUNICH RE GROUP, UPS · MUNICH

[05] COMMUNITY

OPEN SOURCE CONTRIBUTIONS

Selected,
maintained, or
co-created.

CREATOR · MAINTAINER

terraform-aws-eventbridge — official module under terraform-aws-modules. Simplifies AWS EventBridge resource management and is widely adopted across the Terraform community.

CORE CONTRIBUTOR

Formidable (node-formidable) — one of the most widely-used Node.js libraries for parsing multipart form data, with 13M+ weekly downloads.

CONTRIBUTOR

Apache CouchDB Nano — the official Apache CouchDB client library for Node.js.

CORE TEAM

Hoodie — offline-first JavaScript backend framework that pioneered the "no-backend" movement.

[06] STACK

TECHNICAL EXPERTISE

Tools used in
production at
scale.

CLOUD & INFRASTRUCTURE

AWS · GCP · AZURE · IAC

AWS · EC2 · ECS · EKS · Lambda · RDS · S3 · CloudFormation · IAM · VPC · GCP · GKE · Cloud Run · BigQuery · Pub/Sub · Azure · AKS · Azure DevOps · Terraform · Pulumi · Kubernetes · Docker · Nomad

DEVSECOPS & AUTOMATION

CI/CD · SECURITY · OBSERVABILITY

GitHub Actions · GitLab CI · Jenkins · ArgoCD · Zero Trust · OWASP · HashiCorp Vault · Okta · Datadog · Prometheus · Grafana · ELK · Istio · Consul

DEVELOPMENT
